Art Unit 1713

Claims 18-21 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention.

These claims are indefinite in that they are basically directed to intended use of a molded object. An intended use cannot clearly define patentable parameters of a composition.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-24 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Sandstrom et al., Tsuji et al. or Kushida et al.

Each of these patents shows compositions which can be based upon the instantly claimed vulcanizable elastomer. The instantly claimed fillers and pigments are further shown within these references. See specifically Sandstrom at column 6 line 20 - column 8. The Tsuji et al. patent also shows vulcanizable elastomers throughout the entirety of the disclosure. The

formulation of molded articles incorporating pigments and fillers is shown at columns 9-12. The Kushida patent shows the vulcanizable elastomers at columns 2 and 3. The pigments and fillers are shown in column 5. In view of this disclosure, applicants' claims are rendered prima facie obvious.
